

Hello,

Recert is here to help with the complicated NREMT NCCP renewal process! The complex database behind the easy to use Recert dashboard does all the hard work for you. At a glance you can view your progress towards recertification right down to that half hour hemorrhage control requirement. You can even upload your required skill sheet. You can learn more at www.Recert.com.

If you are a North Dakota EMS practitioner simply visit the website and create your account. If you have a Jones & Bartlett Learning account simply login and click the Recert tab.

If you are an agency in North Dakota and would like to learn how Recert can help you manage the recertification process of your EMS personnel, a brief 30m webinar is all it takes. Simply visit www.Recert.com and fill out a quick Demo Request form.

To help support the EMS community, the Recert tracking portfolio is a FREE solution. If needed, the gold standard CAPCE accredited online courses are available by course for \$6.95 or through an annual subscription.

Be safe and thanks for all you do, -Kurt
