Week: 201248

Friday, December 07, 2012

77 Total Influenza Cases

3 Hospitalizations

2 LTC Outbreaks

1 Deaths

Outbreaks

One long term care outbreak was reported this week. The cause of the outbreak was found to be influenza B. This means this year, of the two LTC respiratory outbreaks reported, influenza has been found to be the cause.

Cases of Influenza by Subtype by Week

Respiratory Viruses

	Total
RSV A	0
RSV B	0
Rhinovirus	10
Adenovirus	0
Parainfluenza Virus	3

North Dakota School Surveillance

North Dakota School Surveillance:

Surveillance:

-- If your school would be willing to participate in our surveillance, please contact Lindsey VanderBusch at lvanderbusch@nd.gov.

Sentinel Laboratories--Influenza

Sentinel Laboratory Surveillance

Week 48: Percent positivity for rapid tests are rising. With the increase in influenza activity, please consider influenza as a potential cause of URI in your communities.

RSV activity remains low.

*These data do not represent all laboratory results for influenza.
