

2013-14 North Dakota Weekly Influenza Update

Editor: Jill K Baber
jbaber@nd.gov

Week: 201418

Thursday, May 08, 2014

2855 Total Influenza Cases
142 Hospitalizations
3 LTC Outbreaks
6 Deaths

General Trends

Influenza indicators continue to persist at low levels, with influenza B making up a large majority of the sporadic cases reported. A late-season outbreak of influenza A was reported this week in a long-term care facility in the southeast portion of the state.

Cases of Influenza by Subtype by Week

Outbreaks

Three influenza-like illness outbreaks in long term care facilities have been reported this season, affecting both residents and health care workers. Positive flu results were reported for cases in two of the three outbreaks.

Influenza Cases by County

Cases by Gender

Female	1417
Male	1438
