201443	0.73%	0	2	3	1	0
201444	0.62%	0	2	1	0	1

Cases by Age Group

<10	4
10-19	5
20-29	1
30-39	1
40-49	4
50-59	6
60+	13
TOTAL	34

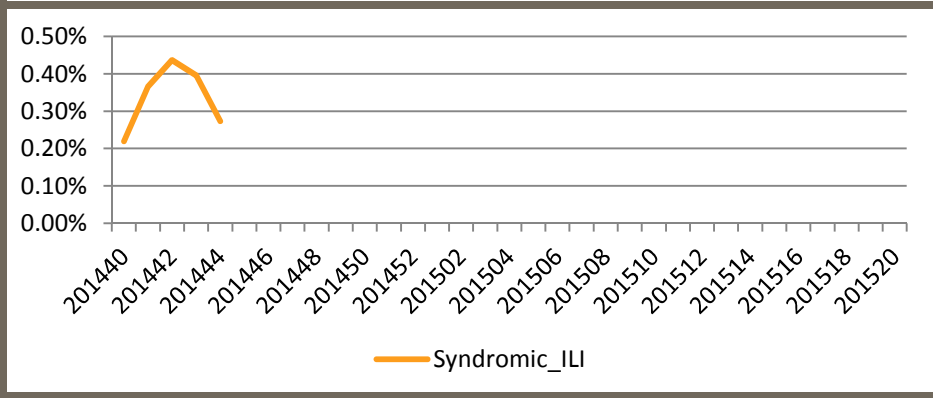

2013-14 North Dakota Weekly Influenza Update

Week: 201444

Thursday, November 06, 2014

North Dakota Syndromic Surveillance ILI -- NEW!

North Dakota Syndromic Surveillance--Influenza-like Illness

The percent of syndromic surveillance visits for ILI this week decreased to 0.27%. Syndromic surveillance data includes hospital and walk-in clinic data from facilities across North Dakota, as well as ND data we receive from the Department of Defense. Influenza-like illness for this group is defined by our syndromic surveillance system, BioSense 2.0. The definition is more sensitive but less specific than our outpatient ILI definition.

Sentinel Laboratories*--Influenza

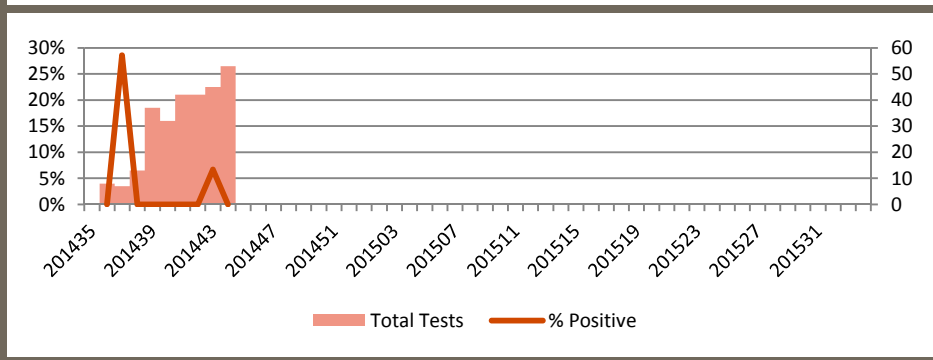

Sentinel Laboratory Surveillance

Percent positivity of influenza testing at sentinel laboratories increased this week to 3.05%.

*These data do not represent all laboratory results for influenza.

Sentinel Laboratories--RSV

Percent positivity for RSV is reported at 0.00% this week.

National Statistics:

National influenza activity and surveillance information is available from the CDC FluView website at: <http://www.cdc.gov/flu/weekly/>, and is updated every Friday.
