

North Dakota Immunization Information System (NDIIS)

Supported Vaccine Codes

All successful HL7 2.5.1 release 1.4 messages must contain a valid CVX code. All successful HL7 2.5.1 release 1.5 messages must contain a valid NDC code for administered vaccines and CVX code for historical vaccines. Below is a table that displays the CVX codes currently supported in the NDIIS. Any unsupported CVX codes sent to the NDIIS will be ignored by the NDIIS messaging system and will not be added to the patient's NDIIS record. For a complete list of NDC codes associated with each supported CVX code, please refer to the [NDC Crosswalk Tables](#) on the IIS Code Sets web page maintained by the Centers for Disease Control and Prevention (CDC).
