North Dakota Immunization Information System:
Coverage Rate Report

The Coverage Rate Report calculates the percent of clients in a specific age cohort who belong to a specific provider site and are up-to-date with the routine vaccinations. A client is considered to belong to a provider if their last dose of vaccine, excluding influenza and COVID-19 vaccine, was received at that provider site.

How To Run a Coverage Rate Report:

1.) The Coverage Rate Report is located under the Coverage Rate Reports Report Type in the NDIIS reports module.
2.) Enter either a minimum and maximum age (in years or months), a birthdate range, or an age group category for the group of clients you want the report to search for.

- Min Age: ______  
- Starting BirthDate: __/__/____
- Max Age: ______  
- Ending BirthDate: __/__/____
- Age In: Years  
- Age Group: -- SELECT ONE --

3.) Select the **Compliance By** option for the report to use to identify up-to-date status.

- Compliance By: Today’s Date
- Report By:
  - 24 months of age
  - 13 years of age

4.) Select **Report By** option to specify whether the report should search for clients by county of residence, or by your provider ID.

- Report By: Provider
  - -- SELECT ONE --
  - County
  - Provider

- If searching for clients by county, use the Add and Remove buttons to select the county or counties you would like to search by. **Add ND Counties** allows for all ND counties to be added at once. Click the OK button to close this window.
• If searching for clients by provider use the **Add** and **Remove** buttons to add your provider to the right Provider column. Click the **OK** button to close this window.

5.) After selecting the client population for the report, use the Doses-Vaccine series window to choose an option for up to date client population for a vaccine series, specific vaccine or vaccines, or up-to-date status by vaccine name. When choosing a vaccine name only, you will need to input the number of doses you would like to search for. You may add more than one vaccine type or up-to-date vaccine status to the report. Click the **OK** button to close this window.

6.) Select **Run Now** or **Run Later** to run your report.
