RE: 2020 - 2021 Seasonal Influenza Vaccine Pre-Book Information

DATE: January 16, 2020

For the 2020 - 2021 influenza season, all Vaccines for Children (VFC) influenza vaccine pre-booking will be done online. The online survey can be found on the North Dakota Department of Health (NDDoH) website at https://www.health.nd.gov/immunize/providers. Please complete the online influenza vaccine pre-book survey by Thursday, January 30, 2020. It is very important that pre-book orders are received prior to this date, as the NDDoH has to pre-book influenza vaccine with the Centers for Disease Control and Prevention. Once the survey is submitted, the provider’s influenza vaccine pre-book has been placed with NDDoH. As usual, the NDDoH asks all providers to print a copy of their submitted influenza vaccine pre-book to have on hand. The last page of the pre-booking survey will prompt providers to do this. Having a copy of your clinic’s influenza vaccine pre-book will be helpful when vaccine begins to ship in early fall 2020. Influenza vaccine may not be provided to clinics who do not pre-book influenza vaccine.

North Dakota providers are encouraged to review 2019 – 2020 influenza vaccination rates and usage and set goals for increasing influenza vaccination rates during the 2020 – 2021 season. Providers should be pre-booking more influenza vaccine for the 2020 – 2021 season to increase influenza immunization rates.

Local public health units (LPHUs) and Federally Qualified Health Centers (FQHCs) will be able to prebook influenza vaccine for un/underinsured adults (i.e., homeless population). This influenza vaccine will be available for LPHUs and FQHCs only. Influenza vaccine that is prebooked by LPHUs and FQHCs for VFC eligible pediatric patients should not be used for the adult population. The VFC Program is an entitlement program, so if children are eligible to receive vaccine, they must be able to receive VFC vaccine.

The NDDoH highly recommends that providers pre-book more than one brand and presentation (i.e., vials and syringes), in case of influenza vaccine supply issues. By pre-booking only one brand or presentation, providers may not receive influenza vaccine until later in the influenza season, or not at all, if their particular brand or presentation is involved in a vaccine availability issue.

delay, shortage, or recall. Also, often in influenza seasons, certain brands or presentations are released through the allocation system sooner, so providers may receive doses earlier for this reason. Please keep in mind to only prebook brands or presentations that staff will be educated on how to use, pre-booking several brands may allow for faster delivery, but if staff are unaware how to administer them correctly it could result in medication errors. VFC influenza vaccine will be shipped from McKesson in multiple shipments to providers for the 2020 - 2021 influenza season.

Aside from the LPHU and FQHC adult influenza vaccine program, NDDoH-supplied influenza vaccine must be used for VFC-eligible children (Medicaid-eligible, American Indian or Alaskan Native, uninsured or underinsured) only. It is your clinic’s responsibility to order private influenza vaccine for insured children to ensure all children in your clinic are vaccinated. VFC influenza vaccine will be allocated to providers based on pre-book orders, previous influenza vaccine orders, doses administered entered into the NDIIS from the 2019-2020 influenza season, and your clinic’s size. Providers are not guaranteed to receive all of the vaccine they pre-book.

Some suggestions for determining the amount of influenza vaccine to pre-book:

- Children, eight years of age and younger, who are receiving influenza vaccine for the first time, will need to receive two doses. The doses should be given at least four weeks apart.
- Use the North Dakota Immunization Information System (NDIIS) to determine the amount of influenza vaccine administered last year. When running a doses administered report in the NDIIS, use "ALL VFC TYPES" for VFC TYPE and "STATE-SUPPLIED" for VACCINE TYPE. Do not select "All Clients." This will show the information based on vaccine type not brand choice.
- Consider the Advisory Committee on Immunization Practices (ACIP) recommendations for vaccination of all children 6 months – 18 years. www.cdc.gov/vaccines/hcp/acip-recs/index.html
