

# Varicella Vaccination Algorithm

<sup>1</sup>Healthcare facilities should consider recommending varicella vaccine for health care workers born before 1980 and without evidence of immunity

<sup>2</sup>Verification can be done by a clinician (e.g., school or occupational clinic nurse, physician assistant, physician). For atypical and/or mild disease history, epi-link to a typical varicella case or evidence or laboratory confirmation at the time of acute disease should be sought.

<sup>3</sup>People, at high-risk for varicella (e.g., outbreak settings), may be vaccinated earlier using proper minimum intervals and ages.

Contact the Immunization Program at 701.328.3386 or toll-free at 800.472.2180 with any questions.
