Please share as appropriate

To: North Dakota Clinical Laboratories  
 From: Christie Massen ([clmassen@nd.gov](mailto:clmassen@nd.gov))  
 Section Chief Officer, Laboratory Services  
 Date: 11/9/2021  
 Re: *Mycoplasma genitalium* TMA

---

The 2021 Directory of Services was sent out earlier this year. The Directory of Services is a resource meant to guide you from specimen collection through the processing and reporting of tests offered by our laboratory. We have added the following test:

<p><b><i>Mycoplasma genitalium</i></b>  <b>TMA</b>          CPT CODE:          87563</p>	<p><b>Acceptable Specimen:</b> Endocervical, urine, vaginal, penile meatal or male urethral specimen in Hologic multi specimen collection kit</p> <p><b>Stability: Swab-Ambient:</b> 60 days; Refrigerated: 60 days; Frozen: &gt;60 days</p> <p><b>Stability: Urine-Ambient:</b> 30 days; Refrigerated: 30 days; Frozen: &gt;30 days</p> <p><b>Normal Value:</b> Negative</p>	<p>\$15</p>
--	---	-------------

For the updated Directory of Services and/or Test Request Form, please refer to our website:  
<http://www.ndhealth.gov/microlab/>

If you have any questions, please contact our facility for the recommended guidance.  
**We are here to serve you!**
